

## **Exactech Announces Commercial Launch of Novel Total Hip Arthroplasty System** *Spartan Stem and Logical Cup represent attractive new solution for Physicians and ASCs*

GAINESVILLE, FLA. (August 16, 2022) – Exactech, a developer and producer of innovative implants, instrumentation, and smart technologies for joint replacement surgery announced the successful first surgeries of the Spartan™ Stem and Logical™ Cup System for total hip arthroplasty.

Featuring a variety of clinically attractive attributes, including industry-leading, three-offset options and a tapered, polished distal segment, the Spartan Hip Stem reflects contemporary patient needs and the newest advancements in surgical approach. The Logical Cup, an advanced, modular acetabular system, is engineered to meet the demands of highly active patients while also enabling an efficient surgical workflow in hospitals and ambulatory surgical centers.

“Our aim is to deliver what physician and institutional customers have been demanding, which is efficient instruments, clinically-advanced implants and ASC-friendly solutions,” said Adam Hayden, Chief Marketing Officer and Senior Vice President of Large Joints for Exactech. “The Spartan Stem and Logical Cup enhance the clinical breadth and depth of our Hip offering and—in combination with our Alteon Hip System—reflect our mission to *Improve the Proven* and deliver a rich and differentiated portfolio of orthopaedic solutions.”

Hasham Alvi, MD, of Barrington Orthopedic Specialists in Schaumburg, Illinois, utilized the Spartan Stem and Logical Cup for the first time in the United States.

“Today’s hip replacement patients demand and deserve the most advanced surgical techniques and implant technologies,” said Dr. Alvi. “The Spartan Stem and Logical Cup Systems adapt seamlessly to my preferred anterior hip surgical technique and feature a highly customizable construct engineered to assist in advantageous positioning of offset and leg length.”

The pilot launch of the Spartan Stem and Logical Cup Systems commenced in limited regions during the third quarter of 2022, and the commercial launch is planned to expand into most geographies across the United States in the first half of 2023.
