

Exactech Announces FDA 510(k) Clearance of the TriVerse™ Primary Knee Replacement System

GAINESVILLE, Fla. (Nov. 4, 2022) – [Exactech](#), a developer and producer of innovative implants, instrumentation, and smart technologies for joint replacement surgery, announced today the 510(k) clearance from the U.S. Food and Drug Administration to market the TriVerse™ primary knee system.

The TriVerse primary knee system is designed to accommodate surgical efficiency in hospitals and surgery centers alike, offering cruciate retaining, anterior stabilized and posterior stabilized constructs. Additionally, the TriVerse insert bearings will be exclusively available in highly crosslinked vitamin E-stabilized polyethylene.

Exactech’s Chief Marketing Officer and Senior Vice President of Large Joints Adam Hayden said, “The TriVerse primary knee system is positioned to be a powerful addition to Exactech’s portfolio that leverages proven design principles and data from hundreds of thousands of total knee replacement patients.”

TriVerse will launch with a compact set of adjustable mechanical instrumentation, with future compatibility planned with the company’s flagship [ExactechGPS®](#) system.

“TriVerse will offer orthopaedic surgeons an impactful solution that is developed using proven implant design features, intraoperative flexibility and a straightforward approach,” said Hayden.

The new system will add to the company’s portfolio of knee solutions, which includes its balanced knee system, award-winning primary and revision implants and instruments and fully integrated GPS platform.

TriVerse will be in limited launch starting in Q2 2023. Visit www.exac.com/knee/ for more information about Exactech’s knee replacement products.
